The Ancient Mind, It's Negative Effects and It's Illumination in the Modern World

By Robert Chamberlain March, BS, ND © 2005-2009

According to the living Muktiⁱ Avatarⁱⁱ, Sri Bhagavan, the ancient mind of humanity has been around for 11,000+ years. This ancient mind is the "group" mind that affects not only all human beings but also all living beings and all of nature.

The very name that is applied to Homo sapiens, the name human, which is normally abbreviated as man, has two roots. Hu means the divine resonance or the divine essence in the spiritual heart of man or the divine word and man means soil, or matter, or thinking or mind. Thus we see that there are two primary influences in man, who has been created in the likeness and image of God. The one influence is the divine spark or the divine word, vibration, or sound (hu) which is anchored in the spiritual heart of man and the other main influence is the physical (soil) and mental (emotion, thinking or mind) nature of man.

Sir James Jeans, an English mathematician, physicist, and astronomer who lived from 1877 to 1946, stated, "The universe begins to look more like a great thought than a great machine" and "The world is nothing but mind stuff." Seen in the light of Jeans' insight, it is this group mind of humanity that has had the greatest impact on the behaviour of human beings over the last 11,000+ years.

The nature and qualities (sifat¹) of this ancient group mind, at this particular stage of humanities evolution, have been dominated primarily by fear, doubt, suspicion, grief, anxiety, anger, hatred, and separation. In a few words, it may be said that currently this ancient mind is filled with darkness and has suffered from a lack of spiritual light.

¹ A Sufi term denoting certain aspects of the Only Being. The Ancient mind is an aspect of the One. The 1001 names of the One is an ancient recognition symbolic of the infinite attributes or qualities of God.

Or we may say that over the last 11,000+ years this ancient mind² has been disconnected from or has overshadowed the spiritual heart of humanity and as a result man has almost completely been absorbed in material creation forgetful of her (his) spiritual nature.

The ancients of many traditions, including Native Americans, Aborigines, the Maori, the Mayans, Vedic seers, the Laika, and others clearly understood that man is not separate from nature.

One quote from Chief Seattle will suffice:

"This we know; the earth does not belong to man; man belongs to the earth. This we know. All things are connected like the blood which unites one family."

A modern expression and understanding of this idea that everything in nature is connected comes through the scientific theories of morphogenesis as reported by Sheldrake, Gilman and McKenna.

As reported on the Experience Festival website (www.experiencefestival.com):

"According to its founder and main proponent, the biologist Rupert Sheldrake, a morphogenetic field is similar to an electromagnetic field that carries information only, not energy, and is available throughout time and space without any loss of intensity after it has been created. Morphogenetic fields are created by the patterns of physical forms. They help guide the formation of later similar systems where a newly forming system "tunes into" a previous system by having within it a "seed" that resonates with a similar seed in the earlier form.

Morphogenetic fields can be used to describe how human consciousness is shared. The Morphogenetic fields therefore play the main role in the idea that humanity at one point in time will go through a dramatic collective shift in consciousness. A shift that will happen when the critical mass for a shift is reached, for example, when a certain number of spiritually awakened individuals are reached."

In its present condition this ancient mind, because it has been disconnected from the spiritual heart has suffered due to its dark nature or its lack of spiritual light (ignorance).

The ignorance of the unenlightened mind has been the root cause of the World Wars (I, II) and the unusually large outpouring of violence recently seen around the world in Israel, Serbia, Africa, Afghanistan, New York City, Iraq, Iran, China and many other places.

² After receiving a Oneness Blessing or Deeksha in Adelaide in 2007 and lying down in the Yoga resting pose called Shavasana, in a vision I was gracefully taken by Bhagavan beyond the earth into outer space. As I looked back at the earth from outer space I could see what looked like an energy field about 7 miles thick covering the earth like a blanket. I knew instantly that this was the Ancient Mind field that surrounds the earth and is attached like an umbilicus to the earth's magnetic core. Depending on the seeds of trauma that we carry from our past lives and in this life primarily from any trauma we perceive during conception, our prenatal life, our birth experience, the first two years of life and our early childhood, these seeds act like tuning forks that resonate with and receive the mostly negative collective energies like fear, doubt, hatred, greed, unworthiness, violence, etc. that are stored, stimulated, and projected from the Ancient Mind field. Thus our trauma seeds keep getting recharged from the Ancient Mind field. As well as awakening our higher brain centers of causeless love and joy, the Oneness Blessing's action on our brain and chakra/endocrine systems helps to detach, defuse, and discharge the trauma seeds stored in our bodymind. Bhagavan shares that awakening is neurobiological.

This ignorance or unenlightened mind is also the root cause of the natural disasters across our planet recently witnessed (Christmas time 2004) in the massive loss of more than 295,000 lives in the Boxing Day Asian earthquake/tsunami.

There is no one to blame for all this pain and suffering. This suffering is part of a cosmological cycle that has been expressing its predominantly darker aspects that result when mankind fails to comprehend its own spiritual nature.

Awakened individuals have provided the necessary counterbalance and relief for this tremendous pain and suffering endured by humanity. Before the light has fully dawned in a new Golden Age awakened individuals have been few and far between in the past.

A list not intended to be exhaustive, the Great Saviours of the world over this last 11,000 years of darkness, including what is known in Vedic cosmology as the present Kali Yugaⁱⁱⁱ or dark age, have included the following spiritual lights from the eastern tradition: Rama, Krishna, Shiva, Buddha, Chaitanya, Ramakrishna, Babaji, Nanak, Bahauallah, Nityananda, Aurobindo, Ramana Maharshi, Chinmoy, Bhagavan and others.

From the western tradition we have been graced with the presence of Melchizedek, Abraham, Solomon, Zoroaster, Moses, Jesus, Mohammed, Shems Tabriz, Rumi, Hazrat Inayat Khan and others.

MAP OF THE SCALE OF CONSCIOUSNESS

God-view	Life-view	Level	Log	Emotion	Process
Self	Is	Enlightenment	700-1,000	Ineffable	Pure Consciousness
		↑			
All-Being	Perfect	Peace	600	Bliss	Illumination
		↑			
One	Complete	Joy	540	Serenity	Transfiguration
		↑			
Loving	Benign	Love	500	Reverence	Revelation
		↑			
Wise	Meaningful	Reason	400	Understanding	Abstraction
		↑			
Merciful	Harmonious	Acceptance	350	Forgiveness	Transcendence
		↑			
Inspiring	Hopeful	Willingness	310	Optimism	Intention
		↑			
Enabling	Satisfactory	Neutrality	250	Trust	Release
		↑			
Permitting	Feasible	Courage	200	Affirmation	Empowerment
		↓			
Indifferent	Demanding	Pride	175	Scorn	Inflation
		↓			
Vengeful	Antagonistic	Anger	150	Hate	Aggression
		↓			
Denying	Disappointing	Desire	125	Craving	Enslavement
		↓			
Punitive	Frightening	Fear	100	Anxiety	Withdrawal
		↓			
Disdainful	Tragic	Grief	75	Regret	Despondence
		↓			
Condemning	Hopeless	Apathy	50	Despair	Abdication
		↓			
Vindictive	Evil	Guilt	30	Blame	Destruction
		↓			
Despising	Miserable	Shame	20	Humiliation	Elimination

To gain a sort of mathematical perspective on the idea of how the level of consciousness of enlightened individuals affects the rest of creation, let's take a very brief look at David Hawkins scale of consciousness as reported in his book, **Power Vs. Force**.

Hawkins arrived at this measurement through kinesiological testing. Calibrations on his scale of consciousness range from 0 to 1000.

Hawkins states,

"Millions of calibrations over the years of this study have defined a range of values accurately corresponding to well-recognized sets of attitudes and emotions, localized by specific attractor energy fields, much as electromagnetic fields attract iron filings... The ways the various levels of consciousness express themselves are profound and far-reaching; their effects are both gross and subtle. All levels below 200 are destructive

of life in both the individual and society at large; all levels above 200 are constructive expressions of power.

The decisive level of 200 is the fulcrum that divides the general areas of force and power... 85% of humanity is below the critical level of 200, while the overall average level of human consciousness today is approximately 204... [As seen above, some] calibrations are 20 - Shame; 30 - Guilt; 50 - Apathy; 75 - Grief; 100 - Fear; 150 - Anger... The power of the relatively few individuals near the top counterbalances the weakness of the masses toward the bottom to achieve this overall average...

Great works of art depicting individuals who have reached the level of Enlightenment (700 and above) characteristically show the teacher with a specific hand position, called a mudra, wherein the palm of the hand radiates benediction.

This is the act of the transmission of this energy field to the consciousness of mankind. This level of divine grace calibrates up to 1000, the highest level attained by any persons who have lived in recorded history - to wit, the Great Avatars to whom the title "Lord" is appropriate: Lord Krishna, Lord Buddha and Lord Jesus Christ... Because the scale of power advances logarithmically, a single avatar at a consciousness level of 1000 can, in fact, totally counterbalance the collective negativity of all of mankind."

Not receiving much mention because of the 5000 years of patriarchy the women saints, seers, shamunkas, yoginis, and Avatars³ have also helped the earth and Her peoples stay in balance as well.

Before he left the planet in 1886, the Avatar Sri Ramakrishna stated that, "in the not too distant future Christs would grow like grapes on a vine, in clusters." Now we are here in 2005 and the phenomenon predicted by Sri Ramakrishna has begun to happen.

The husband and wife team of Sampurna^{iv} Avatars, Sri Bhagavan and Sri Amma of Varadayapalem south India have already brought over 2000 people into a permanent fully functional state of awakening according to Sri Bhagavan.

The awakened state means freedom from this ancient mind and freedom from personal pain and suffering. Awakening or what some would call enlightenment is not a human achievement but is something that must be given to the individual by someone who is themselves enlightened.

It is their stated vision and mission to bring 68,000 people to full awakening by 2012, the end date of the Mayan Calender⁴. 68,000 enlightened people by 2012 will provide the critical mass to create a wave of mass awakening over a three-day period before or during the Venus transit of June 2012. During that period before or during the Venus transit it is believed that the magnetic core of the earth, which is associated with the group mind of humanity, will come to a zero point or 'stand-still'.

³ Sita, Radha, Parvati, Yashodhara, Lakshmi, Sarada Devi, Quan Yin, Alo Devi, Amma Padmavati, Amachi, and others from the eastern tradition and Sarah, Sheba, Zipporah, Mary, Magdalena, Kadija, Amina Begum, and others from the Western tradition deserve mention here.

⁴ Carl Johan Calleman says this end date of the Mayan calendar is in October 2011.

At or before that June time, if there are 68,000 fully enlightened people on the earth, they will act as the critical mass or '100th Monkey' to allow a wave of mass awakening to sweep over the earth and establish a new enlightened morphogenic field.

This mass enlightenment will mark the full establishment of the Golden Age or Sat Yuga, whose inauguration began here on earth in August 2003 according to Sri Bhagavan.

Sri Bhagavan has said the following about the significance of 2012:

"In the Dharma, we also say, 'Mind is Karma'. All actions start from your mind. The mind is nothing but a storehouse of samskaras or past life vasanas from which all action emanates. This is stored in the earth's magnetic field. So in the year 2012, it will become zero for a few days. After that the core will start rotating again. This would be a fresh beginning for man or the dawn of the Golden Age. This is the significance of the year 2012."

This ancient mind may be spoken of as a field of consciousness that has kept humanity in a matrix of turmoil for thousands of years, just like Neo experienced in the three Matrix films, prior to his being set free from the matrix. [Neurologically](#), this ancient mind field operates in the human brain to give the individual an overwhelmingly strong sense of separation and isolation from others & the world around him (her).

As "experientially separate individuals" we identify with and believe that "our thoughts" move through "our minds" and when we have "good thoughts and feelings" we think we are good and that everything is OK and when we have thoughts and feelings that are not liked or accepted by our cultural, moral, religious and societal conditioning, we dislike ourselves and feel bad about ourselves. We are "caught in the matrix."

Sri Bhagavan has shared that:

**"Our mind is not our mind.
Our thoughts are not our thoughts.
Our body is not our body.
Our self is just a concept."**

The lower or unenlightened self is caught up in the illusion, in false beliefs, in the concepts that seem to fill "our mind" and keep us identified with the false self or separate ego.

Through grace, we are set free from this conditioning and we are blessed with the witness state, which may be likened to Hawkins's first level of enlightenment, a level of 700 on his consciousness scale. This is the purpose of receiving the Oneness Blessing of Sri Amma Bhagavan (for details see http://www.bhagavandharma.org/brain_awakening.htm).

We don't have the capacity to rise beyond this ancient mind field on our own, through our own devices, our own thoughts, efforts, and actions. We are like the proverbial drowning man trying to lift himself out of the water by pulling on his own hair or the woman trying to lift herself off the ground by pulling up on her own boot straps. It will never happen. We can not extricate ourselves from this mind field using our own efforts.

Einstein realized this when he made the statement that, "No problem can be solved from the same level of consciousness that created it."

The Ancient Mind can not be risen above using the same wired brain and chakra/endocrine systems that is hooked into it and used by it.

All self directed effort will prove to be of no avail. Self effort must cease, we must realize our own helplessness in the spiritual dimension, and pray, meditate, and call on the grace of the divine to help us.

On a par with the Vedic cosmological understanding, the Mayan calendar provides an understanding of the evolution of human consciousness. The Mayan calendar is a 260-day cycle and each day has a different energy defined by 1 of 20 glyphs (or symbols) and 1 of 13 tones. (13 tones X 20 glyphs = 260 combinations.) This calendar comes to an end in December of 2012.

The very last glyph and tone, 13 Ahau, which is Yellow Cosmic Sun, is the symbol of enlightenment and has a frequency of 920 hertz (on a scale of 10-920). The hertz frequency is the actual musical frequency of a sacred sun. The higher the frequency, the more cosmic the person or day is.

Sri Bhagavan was born on March 7, 1949. According to the Mayan calendar, this means he is a Yellow Cosmic Sun -- the symbol of enlightenment.

He has a tone of 13, the highest tone, and a frequency of 920 the highest and most cosmic frequency.

The following quote is from **The Mayan Calendar and the Transformation of Consciousness** by Carl Johan Calleman, PhD.

"From the perspective of the Mayan calendar, certain aspects of this development in the East [Bhagavan's mission] are remarkable. To begin with, Bhagavan himself was born on a day 13 Ahau (March 7, 1949), which in the Mayan calendar is a much-prophesied energy of enlightenment. Second, Bhagavan's teaching about the deadline for the enlightenment of humanity by the year 2012 is an independently arising confirmation of the validity of the Mayan calendar's deadline for the completion of the cosmic plan. The most advanced ancient spiritual traditions of the West and the East, the Mayan and the Vedic, have been unified in a common framework for understanding the future of humanity."

It is part of the cosmic plan for humanity to move into the Golden Age and be free of the ancient unenlightened mind⁵ of the previous three Yugas.

⁵ With luck the strong possibility exists to have this ancient mind field be replaced by the Superconscious Mind field that was foreseen by the great Yogi Sri Aurobindo.

This will mark the end of the tremendous suffering that humanity has experienced for millennia.

In the *Golden Age* there will be no more separation between the spiritual heart and the mind, no more separation between man and God. Humanity will experience peace and harmony on a world-wide scale never before seen in recorded history. Enjoy the ride and hold on as we move closer to 2012!

This is a picture of the *Golden Ball of divine Grace* that is found at the *Oneness Temple* in *Golden City*, south India. See page 170 of my book, *Bringers of the Golden Ball* to read what Bhagavan said about his experience with the *Golden Ball*.

ⁱ Mukti means liberation, salvation, enlightenment, and freedom from suffering. A Mukti Avatar is someone who has the spiritual capacity, the spiritual power to give people enlightenment.

ⁱⁱ An Avatar is a divine incarnation. The divine consciousness takes on a human body in order to help all of mankind. Bhagavan and his wife Amma are both Mukti Avatars. The MD, PhD kinesiologist, David R. Hawkins has placed Avatars at 1000 or more on his scale of consciousness as reported in his book, **Power Vs. Force**.

ⁱⁱⁱ In Vedic cosmology the spiral of time repeatedly expresses itself in 4 Yugas or Ages: Sat Yuga (*Golden Age*); Treta Yuga (*Silver Age*); Dwarpa Yuga (*Bronze Age*); and Kali Yuga (*Dark Age*) listed in order of decreasing spiritual light or increasing disconnection from the divine consciousness.

^{iv} Sampurna means complete and it refers to an Avatar who has the full flowering of the divine consciousness of Love, Light, Wisdom and Spiritual Power.

^v The author of the **Bringers of the Golden Ball** was blessed with a miracle revealing to him the power of the Lotus Feet of the avatar. See pages 64-66 and 11-14 in that order in my *Bringers of the Golden Ball* book.
